

ADRIAN SPÖRRI

Interim Manager | Turnaround & Transformation

When manufacturing organizations need stability, leadership and execution

When manufacturing organizations face critical transitions, operational challenges or leadership gaps, Adrian Spörri provides the structure, leadership and execution needed to restore stability and drive sustainable performance. With more than 25 years of international experience, he helps manufacturing organizations transform challenges into lasting business results — including managing several parallel mandates with clearly defined capacity.

Typical Challenges

- Leadership gaps
- Turnaround situations
- Quality organizations in transition
- Manufacturing performance issues
- Post-acquisition integration
- Transformation programs
- Parallel multi-mandate coordination
